

PROTECT™

Zonyl* Carpet Guard

DESCRIPTION:

PROTECT™ Carpet Guard with ZONYL* means easy care. It resists soil and stands up against heavy use and frequent vacuuming. **PROTECT™** forms an invisible shield on the carpet which helps keep dirt from lodging itself within the carpet fibers. **PROTECT™** Carpet Guard with ZONYL* forms an invisible shield on the carpet which helps keep dirt from lodging itself within the carpet fibers. Even mud has difficulty seeping in...it dries on the surface and is easily vacuumed away. **PROTECT™** Carpet Guard with ZONYL* keeps carpets looking newer longer. Less soil clings to a carpet treated with **PROTECT™** and vacuuming removes more soil than from an untreated carpet. Frequent vacuuming prevents dirt from becoming embedded beneath the surface and helps carpets retain their beauty longer. Carpets look cleaner between cleaning. **PROTECT™** Carpet Guard with ZONYL* is easily applied by spray application. It dries quickly with no solvent odor and little risk of damage to furniture or woodwork. It has a low application cost. It is effective on all carpet fibers and is especially well-suited to nylon. It contains no flammable or odor-causing solvents, and is stable when stored even in the diluted ready-to-use state. The trademark "ZONYL" has strong customer recognition.

FOR USE ON STAIN WARRANTED CARPETS

DIRECTIONS FOR USE:

Before using, read Material Safety Data Sheet for this material.

PREPARATION OF CARPET: Vacuum the carpet to remove all loose soil. Remove spots by your preferred professional method. Thoroughly clean the carpet using the cleaning method most appropriate for the particular job. NOTE: Shampooing can leave a residue on the carpet which accelerates resoiling and can reduce the performance of the **PROTECT™**. Therefore, when shampooing is required, it should be followed with hot water extraction to remove excess shampoo. It is neither necessary or desirable to remove any fluorochemical finish from carpet which has been treated previously.

DAMP CARPET FORMULA: Apply to the carpet at the rate of 1/2 gallon of **PROTECT™** for every 100 sq. ft. of carpet (10' x 10' area) to be treated.

DRY CARPET FORMULA: Dilute **PROTECT™** 1 to 1 with water, shake, and apply to the carpet at the rate of 1 gallon for every 100 sq. ft. of carpet (10' x 10' area) to be treated.

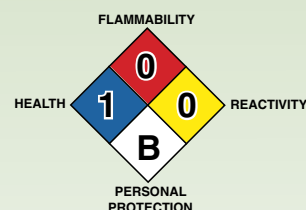

AVAILABLE PACKAGE SIZES

FT 20404 4x1 Gallon Bottles

TECHNICAL DATA

Color: Translucent
 Specific Gravity @ 75F: 1.0
 Density @ 75F: 8.3 lbs/Gallon
 Viscosity @ 75F: Water Thin
 Stability @ 75F: 1 Year Minimum
 Flash Point: None
 Solvents: None
 pH Concentrate: 4.0 - 5.0

HMIS Rating
