

SUPER RINSE AID™

Heavy Duty Wetting Agent

DESCRIPTION:

SUPER RINSE AID is a concentrated nonionic rinsing additive. **SUPER RINSE AID** lowers the surface tension of the rinse water in the rinse cycle. This sheeting action eliminates water spots and streaks that can make clean dishware look dirty. **SUPER RINSE AID** also has the ability to suppress foam at temperatures above 115° F. This defoaming capability allows for more efficient operation by increasing performance of pumps. This product can save many dollars as compared to hand drying. **SUPER RINSE AID** can be used through auto dispensing equipment or a separate rinse tank.

DIRECTIONS FOR USE:

Before using, read Material Safety Data Sheet for this material.

Depending on water conditions the injection system should be set to deliver 50-300 PPM rinse aid or approximately 1/3 oz. per 10 gallons in the rinse cycle. This concentration level must be maintained with an injection system. Adjust the injector to achieve rapid sheeting. If temperature in the dishwasher is allowed to drop below 120 degrees, excessive sudsing may result. For best results **SUPER RINSE AID** should be used at 140 degrees.

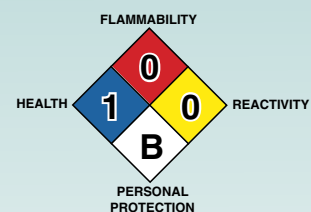

AVAILABLE PACKAGE SIZES

FT 50405 5 Gallon Pail

TECHNICAL DATA

Color:	Blue
Specific Gravity @ 75F:	0.98
Density @ 75F:	8.2 lbs/gal
pH Concentrate:	7.0 - 9.0
Biodegradable:	Yes
Viscosity @ 75F:	Thin
Freeze/Thaw Stable:	Yes - 3 Cycles
Phosphates:	< 1%
