

TSP™

Trisodium Phosphate

DESCRIPTION:

TSP™ is a versatile, heavy-duty cleaner. It is recommended for cleaning walls and woodwork prior to repainting; cleaning wood and metal surfaces for refinishing; or for general cleaning of walls, floors, tile, woodwork, bath fixtures, kitchen appliances, outdoor furniture, cars, boats, etc. One or two tablespoons of **TSP™** added to warm water will provide a quart to a gallon of quick acting cleansing solution, depending on desired strength.

DIRECTIONS FOR USE:

Before using, read Material Safety Data Sheet for this material.

MILDEW CONTROL: A thorough surface inspection should be carefully made for construction defects that allow condensation of moisture to accumulate behind a surface. If such defects exist, an escape for the moisture must be created to prevent surface saturation, the condition which encourages growth. TSP will not prevent growth of mildew.

MILDEW TREATMENT: 4 oz. (1 cup) TSP, 1 qt. bleach, 3 qts. warm water. Use this solution without diluting to remove mildew and dirt. Best results are achieved by scrubbing with a medium soft brush. When surface is clean rinse with fresh water from a hose. Rubber gloves should be worn during application.

AVAILABLE PACKAGE SIZES

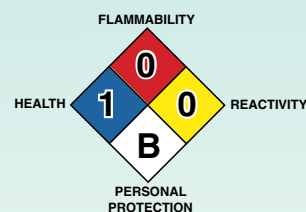

FT 92640 40 Pound Pail
 FT 92675 (4) 7.5 Pound Jars
